
Vision Instant

This beautifully designed and fully automatic dispenser from Dordrecht, Holland incorporates all the plus features of the Classic and Caramba models such as ergonomically designed exterior and interior, easy maintenance and refill of ingredients and using microprocessors to make the same blend and taste for each type of beverage.

In addition, the KnightWell Vision has added features such as automatic cup dispensing and optional coin slot and card system.

Using easy reference display, individuals can choose from a variety of flavours and even pre-programme the strength of the hot beverage according to one's preference. With the Vision, there will be no messy pantry to clean, no more wasted beverages and no more cups to wash. All this will add to a more conducive work environment and productivity.

From the customers' viewpoint, a cup of delicious beverage from the company will make a more lasting positive impression of the company. The use of digital display panel for customised text will cement the corporate identity of the company in more ways than one.

Quality, reliability, versatility, safety and user-friendliness are features that make this dispenser the ideal dispenser for large organisations.
